

Species at Risk Act (SARA) Consultation, Cooperation and Accommodation Project

Species at Risk List for Pacific Region

Glossary of Terms

Action Plan: an action plan is a document that defines the projects or activities required to meet the goals and objectives outlined in the recovery strategy for a wildlife species.

COSEWIC: the Committee on the Status of Endangered Wildlife in Canada (COSEWIC) is an independent advisory panel to the Minister of Environment and Climate Change Canada that meets twice a year to assess the status of wildlife species at risk of extinction. Members are wildlife biology experts from academia, government, non-governmental organizations and the private sector responsible for designating wildlife species in danger of disappearing from Canada.

Endangered: a wildlife species that is facing imminent extirpation or extinction.

Management Plan: a management plan is a document that sets goals and objectives for maintaining sustainable population levels of one or more species that are particularly sensitive to environmental factors, but which are not in danger of becoming extinct.

Recovery Strategy: a recovery strategy is a document that outlines the long-term goals and short-term objectives for recovering a species at risk, based on the best available scientific baseline information.

Special Concern: a wildlife species that may become a threatened or an endangered species because of a combination of biological characteristics and identified threats.

Species at Risk: an extirpated, endangered, threatened species, or a species of special concern.

Threatened: a wildlife species that is likely to become endangered if nothing is done to reverse the factors leading to its extirpation or extinction.
