

Terrestrial Species at Risk Overview Prairie Region

Species At Risk Act Consultation, Cooperation, and Accommodation Workshop In partnership with the Centre for Indigenous Environmental Resources

Paulson Des Brisay, Species at Risk Biologist Canadian Wildlife Service - Environment and **Climate Change Canada (CWS-ECCC)**

Sept 28, 2023

Introduction and Acknowledgement

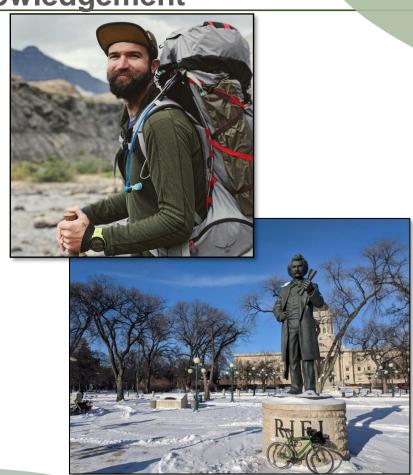

Ancestors came to the prairies from Iceland, UK in 1800s

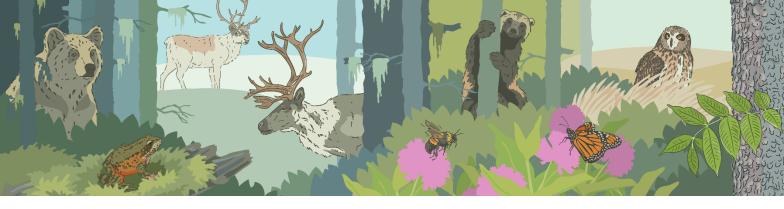

Born and raised in Ottawa and Gatineau

Moved back to the Prairies – Manitoba in 2014

Started working for the Canadian Wildlife Service in 2019

Paulson.DesBrisay@ec.gc.ca

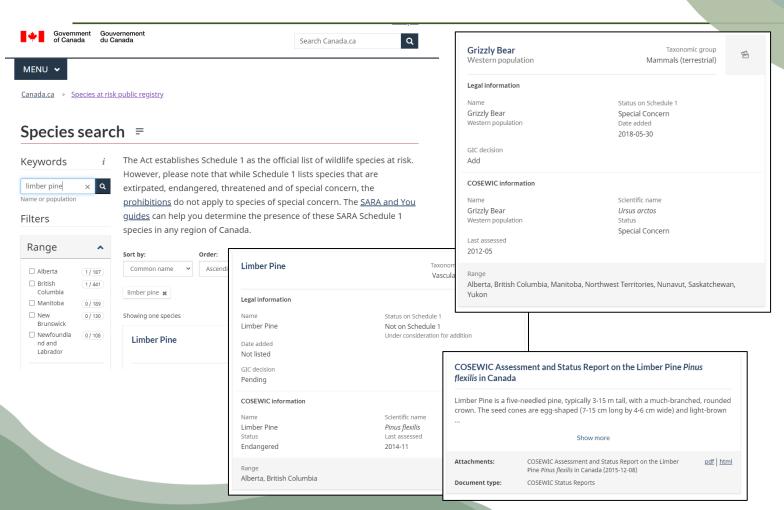

Today's goals:

- Provide a high-level overview of some species that undergoing listing or recovery planning in Prairie Region
- Help identify relevant Species at Risk that align with your priorities and the types of activities you might want to include in a funding request
- Work together to increase Indigenous representation in federal recovery planning processes and to conserve and recover Species at Risk

SARA Registry

SPECIES THAT ARE A FOCUS FOR PRAIRIE CWS

Species	SARA Status	Reason for Focus
Wood and Plains Bison	Under consideration for Threatened	Cultural significance
Migratory Bats	Proposed EN	Rapid declines
Wolverine	Special Concern	Management Plan in development
Boreal Birds	Special Concern	Management Plans in development
Grassland Birds	Special Concern to Endangered	Multi-species opertunities
Monarch	Proposed Endangered	Identifying Critical Habitat
Bumble Bees	Threatened / Endangered	Guild declines
Black Ash	Proposed EN	Indigenous Harvest
Whitebark / Limber Pine	Endangered / Proposed EN	Draft Recovery Strategies

WOOD BISON

(Threatened)

© Richard Wiace

Recovery Updates

- Recovery Strategy completed in 2018;
 identified broad strategies for recovery
- Priority Species under the Pan Canadian
 Approach to Species at Risk Conservation
- Currently facing imminent threats to recovery (Wabasca and Ronald Lake herds)*

*Please contact CWS for more information on projects related to Wabasca or Ronald Lake herds before submitting proposals

PLAINS BISON

(Assessed as Threatened)

© Wes Olson

Recovery Updates

- Assessed by COSEWIC as Threatened in 2003 and 2013
- Listing consultations finished in 2022
- Waiting for Minister's listing decision
- Looking ahead to recovery planning if listed

MIGRATORY BATS

(ALL ASSESSED AS ENDANGERED)

HOARY BAT

WOLVERINE

(SPECIAL CONCERN)

Recovery Updates

- Management plan is underway engaging on first draft sometime in the new year.
- Open workshops coming up
 - October 12th First Nations in MB
 - October 30th First Nations in AB
- Other specific groups scheduled separately
- Do you want to meet with us? Do you want you to hold your own meeting?

Please contact CWS for more information

Boreal Birds – Management Plans

*All Special Concern

HARRIS'S SPARROW

OLIVE-SIDED FLYCATCHER

COMMON NIGHTHAWK

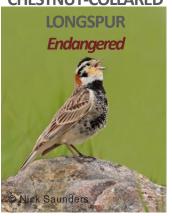

LESSER YELLOWLEGS

Grassland Birds

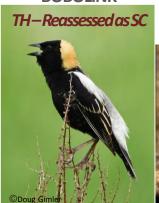

THICK-BILLED LONGSPUR

BOBOLINK

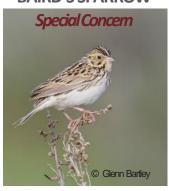

SHORT-EARED OWL SC-Reassessed as TH

Lark Bunting

BAIRD'S SPARROW

FERRUGINOUS HAWK

POLLINATORS!

- Capacity request to organize a species-specific meetings to share knowledge.
- Capacity requests to participate in community science i.e., youth engagement
 - Tri-national Monarch Knowledge Network (https://birdscanada.org/naturecounts/tmkn/main.jsp)
 - Bumble Bee Watch (https://www.bumblebeewatch.org/)
- Capacity requests to assess land use/weed management for Recovery Planning

BUMBLE BEES

Species	SARA Status	Recovery Doc
Gypsy Cuckoo Bumblebee	Endangered	Recovery Strategy
Suckley's Cuckoo Bumble Bee	Assessed as Threatened	Recovery Strategy
Western Bumble Bee (occidentalis subspecies)	Assessed as Threatened	Recovery Strategy

Female Gypsy Cuckoo Bumblebee by Sheila Colla

Female Western Bumble Bee (occidentalis) by Sheila Colla

THREATS

- Pesticides
- Habitat loss
- Climate change
- Parasites and infections from introduced commercial bumble bees
- Decline of other host bumble bee species, especially Western Bumble Bee and Yellow-banded Bumble Bee (SC)

Trees!

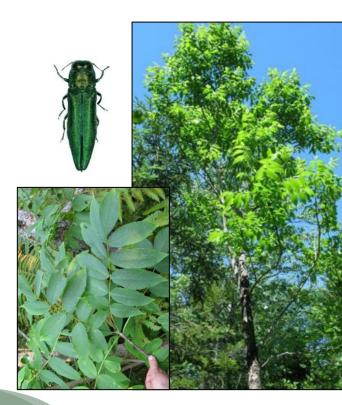

WHITEBARK PINE (ENDANGERED)

LIMBER PINE (Assessed as Endangered)

Black Ash (Assessed as Threatened)
